Benefits of Organic
Skin & Body Care

Wild Seaweed Skin Care
What are AFA Peels?
Coffee Berry Skin Care
Upcoming Seminars

I am very happy to announce our 25th year this April! Skin Unique celebrates with OPEN HOUSE! It is indeed very exciting time to look back and see how far we all have come; I am continuing devotee to even better holistic skincare practices, offering help to all of you on all levels of your existence, not only in skin care! Feeling truly grateful for the years past and years to come, as global expansion of consciousness continues - so do we. Spiritually speaking, when you go with the flow and listen to your intuition all is well. OPEN HOUSE offers lots of complimentary facial treatments and education of the benefits in using organic and natural skincare - without

colors, perfumes, parabens, additives, or preservatives. From amazing levels of anti-aging antioxidants in Coffee Berry Skin Care (as seen on Dr. Oz), to natural AHA of fruit, herbs and veggies of famous Hungarian organic Eminence Skin Care, to un-surpassing and totally organic Wild Seaweed Skin Care, with its healing, nourishing and anti-aging properties. Natural, corrective, non-chemical peels - AFA, Eminence or Holistica - each one is different. Through my turbulent times and tough life lessons, there is still deep passion and drive in me as it was when I first open my shop. I am so very happy to offer my best to you.

Why organic skin care?

Roots of organic Skin Care have been in existence for centuries. Cleopatra and her beauty secrets - essential oils and all miracles of mother earth! Chemicals did not exist. They have been added slowly to "improve" the beauty and the food industry. To choose organic versus in-organic you choose health and save our planet as well. Now a day cocktails of very toxic chemicals are added to our food, water, used in beauty industry and sprinkled from airplanes. They weaken our immune systems, deposits in our fat cells and set an easy path for disease to come in. Stress and over active mind, fast pace society, rapid earth shifts all that has

an effect on our sense of well being. So wake up and smell the roses! Going organic whether it is produce, lawn care or beauty products, you are not only building a healthy body but you are saving your kids future and our planet. What we eliminate and throw out in our trash (including pharmaceutical drugs) will end up on our water table, food table and poison our planet as well. Where are your children going to live?

Going back to nature, using organic essential oils, organic skin/body care, eating whole organic foods, mainly raw fruits and vegetables, your body will find new energy to heal itself and you will look radiant and youthful.

Organic Skin Care goes beyond our senses.

available*

Nature is here for all of us, just look around! It was created to can sustain our lives here on earth.

When we start looking after our faces and our bodies with organic skin care, and get informed, we tend to expand into the world of other organic and clean products for the house, lawn etc, caring about our environment, the air we breathe and also about each other. This creates a shift deep inside of us. Because these subtle changes go down to soul level, the soul growth inevitably follows and that is what our life is all about from the spiritual perspective. Often times the soul pushes you against our will to change - through disease. This is the way your body is telling you to go in different direction. We do not

understand this process and get very angry, instead of recognizing it for just what it is. There are many people who considered their disease a blessing, because when they understood it and change their lifestyle, things totally turn around for them.

We still have to deal with our non-stop chattering mind. It never shuts up. Do you know that our thoughts create our reality? Free will, free choices, we are the creators of our lives. We need to make wiser choices at any point of our lives, and train our minds to listen to us, rather than the other way around. Life is continuous journey - always a rebirth into another dimension, another form of consciousness. I hope for better one each time around. Don't you?

Certified Organic - Wild Seaweed Skincare

The stresses of everyday life, fatigue, pollution and poor eating habits all affect the body leading to vitamin and mineral deficiencies, which result in poor immunity to the effects of the environment to the skin, including broken capillaries, loss of firmness, skin lesions, dry skin and more. It has been proven that seaweed stimulates and improves blood and lymph circulation, thereby revitalizing and firming the skin while re-establishing natural moisture levels. Known to nourish, oxygenate it also detoxifies

and reduces the appearance of cellulite. Benefits of seaweed to the skin include re-balancing, re-mineralizing, nourishing, hydrating, detoxifying, cell regenerating, purifying and oxygenating. Seaweed cleanses, tones, soothes, regenerates body tissues, with positive effects on thyroid gland, offering a new energy, and helps to maintain a youthful appearance. Seaweed grabs all the richness from the sea – a salad bar of fantastic nutrients. There is no genetic manipulation, fertilizer or pesticides. Just goodness from the sea

Natural AFA Skin Peel

The AFAs in the Clay-Peel are the same amino acids that are recognized as part of the Natural Moisture Factors (NMF) of human skin. These amino acids are present in the epidermis of human skin and are a vital factor in keeping the skin appearing healthy and youthful. AFAs are potent, stable antioxidants and powerful exfoliants that produce little to no irritation, have natural ability to retain moisture and are specifically design to address aging skin, wrinkles and pigmentation

irregularities (sun damage), as well as enlarged pores. Best of all, it's fast, simple, and requires no down time. A series of 6 professional applications is recommended.

Lights and its benefits.

Coffee Berry Skin Care

Coffee cherry has naturally superior high antioxidant content - defense against aging, free radicals, and oxidative stress. Coffee cherry is loaded with the most potent mixture yet discovered, providing even more free radical scavenging health benefits than green teas, vegetables or fruit. They are an excellent natural skin exfoliants. CofffeeBerry[®] naturally moisturize, evens pigmentation, protects, soothes, calms and revitalizes dry, mature, sun damaged skin. CofffeeBerry[®] Enzyme Masque will produced significant improvements with photo-damaged skin. Study shows rapid improvement with six weekly facial treatments twice per week shows, with no signs of skin intolerance.
